OPERATING SYSTEM

The KRISS Vector, chambered in .45 ACP, utilizes the patented KRISS Super V recoil mitigating system, which reduces felt recoil by 60% and muzzle climb by 95% when compared to traditional operating systems. The KRISS Super V system reduces felt recoil by redirecting the bolt's energy downward, away from the shooter's shoulder. Designed for the 21st century shooter, the KRISS Vector is the most controllable .45 ACP firearm in the world.
